****Total Expenses during the Period****: Rs 9,350

- August 1, 2026: Shop Rent, Rs 8,000
- August 4, 2026: Electricity Bill, Rs 1,350

Summary of Financial Performance

- **Total Revenue (Sales)**: Rs 6,605

- **Total Purchases**: Rs 8,700

- **Total Expenses**: Rs 9,350

Net Position:

Net Loss: - Rs 11,445

Key Observations

- Revenue vs Expenses**: The store incurred a net loss for the week of Rs 11,445, indicating that expenses exceeded revenues.
- Sales Performance**: The highest revenue from sales was from B-Complex Tablets and Amoxicillin 500mg, both important for customer health awareness during an infection season.
- Stock Monitoring**: Continuing to monitor purchase volumes is advised, as total purchases during this period exceeded total sales, indicating potential inventory overstock.
- Fixed Costs**: The shop rent remains a significant fixed cost, so attention to managing other variable costs is critical.
- Market Trends**: The demand for products like Hand Sanitizer and B-Complex Tablets indicates a consumer trend towards health and hygiene, stemming from ongoing health awareness campaigns.

Recommendations

- Consider strategies to increase sales during low periods, such as promotional campaigns or bundle offers to clear excess stock.
- Improve monitoring of inventory levels and purchase quantities to minimize excess stock and related holding costs.
- Evaluate service offerings, potentially introducing new popular items based on observed trends in customer purchase behavior.
