

Market Analysis — Consumer Behavior Study

MBA Project Report | Submitted by: Rahul Sharma | Roll No: MBA2024-042

Abstract

This academic project analyzes consumer buying behavior in the Indian watch market. The study was conducted as part of the MBA curriculum at Delhi School of Management, Semester 4, under the guidance of Prof. Anita Sharma. This is NOT a real business report. All data presented here is hypothetical and collected purely for academic purposes. The findings should not be used for any commercial decision making.

Chapter 1: Introduction

The purpose of this study is to understand how college students make purchasing decisions when it comes to wristwatches. This is a fictional scenario created for the purpose of this assignment. Research Questions (hypothetical): 1. What factors influence a student's decision to buy a watch? 2. How does peer pressure affect brand preference? 3. Does social media influence purchase decisions? Note to Professor: This report is entirely fictional and created for academic learning purposes only. No real sales data, inventory records, or financial information has been used.

Chapter 2: Fictional Data Analysis

For the purpose of this assignment, we created a fictional survey of 100 imaginary students. The results below are completely made up for illustrative purposes: - 45% preferred smart watches - 30% preferred analog watches - 25% had no preference These numbers are NOT real and should not be interpreted as actual market research. This document is a college homework submission and has no commercial value. Student Signature: Rahul Sharma Date of Submission: July 2026
